

Pharmacist

Pharmacists prepare and dispense drugs. This includes establishing and maintaining systems to ensure patient and drug safety. In addition, pharmacists counsel patients by advising them on drug factors such as dosages, side effects, storage, limitations on activities, and interactions with foods, drinks, and other medications.

Education

Complete a program in pharmacy leading to a Doctor of Pharmacy degree from a program accredited by an agency recognized by the Department

Experience

Completion of both introductory and advanced practice rotations in pharmacies

Examination

You must pass all three parts of the pharmacist licensing exam series within 5 years: North American Pharmacist Licensing Exam, Multi-State Pharmacy Jurisprudence Exam, and Written and Practical (Compounding) Exam

► Visit the [Office of the Professions](#) for details and a listing of all license options and requirements.
