

Speech-Language Pathologist

Speech-language pathologists evaluate, diagnose, and treat disorders of speech, voice, swallowing, and language. These professionals treat communication problems experienced by people of all ages, including problems resulting from injuries and illness. If they determine that speech or language therapy is needed, speech-language pathologists design a program of activities to address the needed areas and guide their patients through the process.

Education

Graduate degree from a [Department-registered](#) speech-language pathology licensure program, or the equivalent.

Experience

At least 36 weeks of supervised experience in speech-language pathology, following completion of all graduate degree requirements.

Examination

Specialty Area test of the Praxis Series, Praxis II, administered by the Educational Testing Service (ETS) in speech-language pathology

► See the [Office of the Professions](#) for a listing of all options and requirements.
