Amd §§6801 & 6802, Ed L

Relates to the definition of the practice of pharmacy.
STATE OF NEW YORK

3040--B

2021-2022 Regular Sessions

IN ASSEMBLY

January 22, 2021

Introduced by M. of A. McDONALD, BLANKENBUSH, TAGUE, WALCZYK, BRABENEC, GOTTFRIED, JACKSON, STIRPE, GUNTHER, GRIFFIN, STECK, LUPARDO, BUTTENSCHON, WOERNER -- Multi-Sponsored by -- M. of A. SAYEGH -- read once and referred to the Committee on Higher Education -- recommitted to the Committee on Higher Education in accordance with Assembly Rule 3, sec. 2 -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee -- again reported from said committee with amendments, ordered reprinted as amended and recommitted to said committee

AN ACT to amend the education law, in relation to the definition of the practice of pharmacy

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Subdivision 22 of section 6802 of the education law, as amended by chapter 555 of the laws of 2021, is amended to read as follows:

22. "Administer", for the purpose of section sixty-eight hundred one of this article, means:

a. (1) the direct application of an immunizing agent to adults, whether by injection, ingestion, inhalation or any other means, pursuant to a patient specific order or non-patient specific regimen prescribed or ordered by a physician or certified nurse practitioner, for: immunizations to prevent influenza, pneumococcal, acute herpes zoster, hepatitis A, hepatitis B, human papillomavirus, measles, mumps, rubella, varicella, COVID-19, meningococcal, tetanus, diphtheria or pertussis disease and medications required for emergency treatment of anaphylaxis; and other immunizations recommended by the advisory committee on immunization practices of the centers for disease control and prevention for patients eighteen years of age or older if the commissioner of health in consultation with the commissioner determines that an immunization:

(i)(A) may be safely administered by a licensed pharmacist within their

A. 3040--B

lawful scope of practice; and (B) is needed to prevent the transmission of a reportable communicable disease that is prevalent in New York state; or (ii) is a recommended immunization for such patients who: (A) meet age requirements, (B) lack documentation of such immunization, (C) lack evidence of past infection, or (D) have an additional risk factor or another indication as recommended by the advisory committee on immunization practices of the centers for disease control and prevention. If the commissioner of health determines that there is an outbreak of disease, or that there is the imminent threat of an outbreak of disease, then the commissioner of health may issue a non-patient specific regimen applicable statewide.

[b-] (2) The direct application of an immunizing agent to children between the ages of two and eighteen years of age, whether by injection, ingestion, inhalation or any other means, pursuant to a patient specific order or non-patient specific regimen prescribed or ordered by a physician or certified nurse practitioner, for immunization to prevent influenza and medications required for emergency treatment of anaphylaxis resulting from such immunization. If the commissioner of health determines that there is an outbreak of influenza, or that there is the imminent threat of an outbreak of influenza, then the commissioner of health may issue a non-patient specific regimen applicable statewide.

b. The injection of medications into the deltoid muscle for the treatment of mental health and substance use disorder, as prescribed or ordered by a licensed prescriber, acting within the scope of their practice in this state and in accordance with regulations promulgated by the commissioner and the department of health in consultation with any other state agencies as necessary, but not be limited to, providing that:

(1) Such administration is conducted pursuant to a valid prescription or order that authorizes a pharmacist to administer medications for the treatment of mental health and substance use disorder and the pharmacist notifies the licensed prescriber that the administration is complete. Administration in a pharmacy may not commence until after the patient has received the initial injection and is considered eligible for maintenance treatment by the licensed prescriber.

(2) Such prescription may be subject to reassessment at appropriate intervals, as determined by the licensed prescriber.

(3) Such activity is conducted in accordance with regulations, promulgated or adopted by the commissioner and the department of health, in consultation with any other state agencies, as necessary, which shall include requirements for the following:

(i) Training accredited by the accreditation council for pharmacy education, that may include educational experiences obtained through pharmacy school curricula, or a similar health authority or professional body appropriate for the medications being administered and their respective patient populations. Such training must be satisfactory to the commissioner and the department of health, in consultation with the board of pharmacy and any other state agencies, as necessary, which shall include, but not be limited to learning modules on techniques for administration by injections, indications, precautions, and contraindications in the use of agent or agents; record keeping and information; and handling emergencies, including anaphylaxis, needle-sticks and cardiopulmonary resuscitation.

(ii) Maintaining continued competency regarding the populations served and medications administered.

(iii) Pre-administration patient consent and education regarding common side effects, drug interactions, injection site reactions and
A. 3040--B

other information routinely provided to patients upon dispensing. If a
patient is unable to provide consent, the pharmacist must obtain consent
from a person legally responsible when the recipient is incapable of
consenting.

(iv) When administering an injection in a pharmacy, the pharmacist
shall provide an area for the injection that provides for the patient's
privacy.

(v) Record keeping and reporting of such administration by electronic
transmission or facsimile to the patient's licensed prescriber, and, to
the extent practicable, make himself or herself available to discuss the
outcome of such injection, including any adverse reactions, with the
licensed prescriber acting within their scope of practice.

§ 2. Section 6801 of the education law is amended by adding a new
subdivision 8 to read as follows:

8. A licensed pharmacist within their lawful scope of practice may
administer injectable medications into the deltoid muscle, pursuant to
section six thousand eight hundred two of this article, for the treat-
ment of mental health and substance use disorder, as prescribed or
ordered by a licensed prescriber, acting within their scope of practice
in this state and in accordance with regulations, including but not
limited to regulations promulgated by the commissioner in consultation
with any other state agencies, as necessary.

§ 3. This act shall take effect one year after it shall have become a
law. Effective immediately, the addition, amendment and/or repeal of any
rule or regulation necessary for the implementation of this act on its
effective date are authorized to be made and completed by the commis-
ssioner of education on or before such date.
NEW YORK STATE ASSEMBLY
MEMORANDUM IN SUPPORT OF LEGISLATION
submitted in accordance with Assembly Rule III, Sec 1(f)

BILL NUMBER: A3040B

SPONSOR: McDonald

TITLE OF BILL:
An act to amend the education law, in relation to the definition of the practice of pharmacy

PURPOSE OR GENERAL IDEA OF BILL:
This bill allows pharmacists to administer injectable medications for substance use disorders and mental health.

SUMMARY OF SPECIFIC PROVISIONS:
Section 1 amends Education Law Section 6802, subdivision 22 as added by chapter 555 of the laws of 2021 to include pharmacist administered injections for mental health and substance use disorders within the definition of administer and sets out the parameters for the prescription and order, training, record keeping, and reporting.

Section 2 amends Education Law Section 6801 to add a new subdivision 8 to include pharmacist administered injections in the deltoid for mental health and substance use disorders within the definition of administer and sets out the parameters for the prescription and order, training, record keeping, and reporting.

Section 3 establishes the effective date.

JUSTIFICATION:
New York is one of 11 states that do not allow pharmacist medication administrative authority for non-vaccine items and one of 14 states that do not allow pharmacists the administrative authority to administer Long-Acting Injectable Antipsychotics.

There is a public health need in the US for increased access to behavioral health services-including Long Acting Injectables (LAIs) that are either used for mental health or substance use disorders. The challenge with the oral forms of these medications is non-adherence, which is very prevalent. For example, half of patients diagnosed with schizophrenia do not take their medications as prescribed and re-admission rates are five times higher in patients who are non-adherent than those who are adherent. This high rate of non-adherence can be linked to many reasons including the side effects of the medications, diversion and other factors that can contribute to clinical relapses and hospitalizations which can cause significant distress for the patient and high costs to the health care system. More importantly, treatment goals are not being met which is of benefit to the patient and society as a whole.
Due to the high accessibility of community pharmacies that are much closer to patient's homes and have more extensive hours of operations than a clinic setting, pharmacists are well suited to administer LAIs in the community setting. Additionally, pharmacies are able to provide on-demand or appointment-based delivery as has been implemented for vaccine administration and they are well equipped to maintain a large medication inventory, something medical offices are not well-suited for. Moreover, the ability to allow pharmacists to administer LAI's in the community setting will also help reduce the stigma of patients who need to go to a specific type of clinic for their disease which at times is not only a challenge with transportation but also with how they feel they will be perceived. In addition, the COVID-19 pandemic may make a patient less likely to travel to a traditional medical setting. Finally, in the community pharmacy setting, pharmacies are able to include policies and procedures for communicating care delivery back to the patient's health care provider and other coordination services which is critical information that a provider cannot always access easily.

This bill will improve patient access and adherence while reducing stigma at a time when a growing number of individuals in our communities are struggling with mental health concerns and/or a substance abuse disorder.

PRIOR LEGISLATIVE HISTORY:

2017-2018 A.8661

FISCAL IMPLICATIONS:

None.

EFFECTIVE DATE:

This act shall take effect one year after it shall have become law, subject to additional provisions.
