

DRAFT SURVEY QUESTIONS – RN Programs & Simulation

NYSED is planning to use a survey (a draft of which is below) to learn more about the current use of simulation by licensure qualifying RN education programs. Before finalizing the survey, NYSED would like input from the BON and from nursing education organizations. Please feel free to recommend changes to information below or propose additional questions. Written input should be provided to NYSED by EMAIL nursebd@nysed.gov no later than April 15, 2023.

DRAFT Survey of Licensure Qualifying Registered Professional Nursing Education Programs on Current use of Simulation

The New York State Education Department (NYSED) would like to learn more about the current use of simulation by NYSED registered licensure qualifying registered professional nursing education programs ("RN programs"). NYSED intends to use information gained from this survey to guide future policy decisions that impact nursing education programs. NYSED requests education institutions that offer licensure qualifying RN programs to complete this survey no later than [insert date].

For the purposes of this survey the following terms are defined below.

Simulation Laboratory Education means clinical practice taught by RN program faculty in a nursing skills or simulation laboratory, which requires RN students to practice nursing skills and decision-making. Simulation Laboratory Education complements Clinical Education and prepares students for hands-on patient care. Simulation laboratory education may be co-taught by RN program faculty and educators with expertise in clinical simulation instruction.

On-line Simulation means the use of computer-based health care simulation education technology to educate RN students outside of a nursing skills or simulation laboratory.

Simulation means Simulation Laboratory Education and Online Simulation.

Education Institution Name:

Title of Licensure Qualifying RN program:

NYSED Program Code:

Please identify the type of licensure qualifying RN program.

- Associate Degree
- Diploma
- Baccalaureate Degree
- Master's Degree

How many RN students are currently enrolled and taking nursing courses?

- Less than 50
- 50 to 99
- 100 to 149
- more than 149

Does the RN Program own and operate a nursing skills or simulation laboratory?

Does the RN Program educate RN students in a simulation laboratory that is owned by another organization?

DRAFT SURVEY QUESTIONS – RN Programs & Simulation

Does the RN Program educate students in a simulation laboratory that is accredited by the Society for Simulation in Health Care or another nationally recognized health care simulation accreditation organization?

Does the RN Program offer students simulation laboratory education that is facilitated by educators who are certified as health simulation educators by the Society for Simulation in Health Care or another nationally recognized health simulation certifying body?

Please indicate on the chart below whether the RN program offers the following types of simulation in the following courses.

Course or Subject	High Fidelity <small>Clinical Scenarios with computerized patient simulators</small>	Mannequins, Complex or Partial task trainers	Role Play with other Students	Standardized Patients (Actors)	Online Simulation	Other (Please describe here)
Nursing Fundamentals						
Medical Surgical						
Obstetrics						
Geriatrics						
Psychiatry/ Mental Health						
Pediatrics						
Leadership/ Management						
Other (Please Specify)						

Does the RN program offer remedial simulation laboratory education (facilitated by faculty) to students?

Does the RN program offer students additional simulation laboratory education (facilitated by faculty), which is not required by the curriculum?

Does the RN program offer students online simulation assignments that are not facilitated by RN faculty in real time (i.e., homework assignments)?

Optional: Provide additional comments regarding simulation education here: _____
