

**Engineering  
Land Surveying  
Geology  
Registration Remittance Addendum**

**Continuing Education:** Beginning January 1, 2004, each Professional Engineer and Land Surveyor registered to practice in the State of New York must complete approved continuing education. Beginning January 1, 2022, each Professional Geologist registered to practice in the State of New York must complete approved continuing education.

- Professional Engineers and Professional Geologists are required to complete 36 hours of approved continuing education.
- Land Surveyors are required to complete 24 hours of approved continuing education.

Professional Engineers and Land Surveyors with renewal dates starting in January 1, 2005 must report completion of 1 hour for each month starting January 1, 2004 through the beginning of their new registration period up to a maximum of 36 hours for Professional Engineers and up to a maximum of 24 hours for Land Surveyors. Professional Geologists with renewal dates starting in January 1, 2023 must report completion of 1 hour for each month starting January 1, 2022 through the beginning of their new registration period up to a maximum of 36 hours. A continuing education fee of \$45 per triennium has been added to the registration fee. Licensees must maintain documentation of their completed required continuing education for a period of six years and be subject to audit by the New York State Education Department. **Do not send any continuing education documents with this addendum.**

THE FOLLOWING INFORMATION IS ONLY FOR THOSE INDIVIDUALS WHO HAVE NOT MET THE CONTINUING EDUCATION REQUIREMENT.

**Individuals who have NOT met the continuing education requirement MUST choose one of the following options and return this form with their Registration Remittance Document and fee (if required).** Your signature indicates agreement with the terms of the option that you have selected.

1.  I do not intend to practice in New York State during the period indicated on the Registration Remittance Document, and am requesting that my registration be placed in an **INACTIVE STATUS**.

As long as your registration remains inactive, you are not responsible for either the registration fee or the continuing education requirement. Please realize, however, that if you wish to resume practicing in New York, certain continuing education requirements must be met prior to reactivating your registration. **You may not practice Engineering, Land Surveying or Geology in New York State if you are not registered.**

2.  I request a **CONDITIONAL REGISTRATION**.

Conditional registrations are not automatic and may be issued at the Department's discretion. A conditional registration, if granted, is valid for one year and cannot be renewed or extended. You may request a conditional registration for a one-year period if you agree to the following four items:

- Pay the full registration fee for the one-year conditional registration;
- complete the continuing education hours you are lacking from your previous registration period;
- complete the regular continuing education requirement prorated for the one-year conditional registration period, and, at the end of the conditional registration period;
- provide proof of course completion and pay the full registration fee for the remaining two years of your registration when the conditional registration expires.

Prior to the end of the one-year conditional registration period, you will be sent a Registration Remittance Document that you must complete and submit with the fee and proof of course completion before you will receive a registration for the remaining two years. **Failure to meet the requirements of the conditional registration may subject you to prosecution for professional misconduct.**

3.  I request an **ADJUSTMENT** to the continuing education requirements for registration.

Adjustments to the continuing education requirement (not an exemption) may be granted by the Department for reasons of health documented by an appropriate health care professional, extended active duty with the armed forces of the United States, or other good cause beyond the licensee's control which in the judgment of the Department makes it impossible for the licensee to comply with the continuing education requirements in a timely manner. A **written explanation** documenting the circumstances which prevented compliance with Education Law **must be included** with this form.

Fax number \_\_\_\_\_ Email \_\_\_\_\_

4.  I request an **EXEMPTION (Engineers and Geologists ONLY)**. I certify I am exempt and meet the requirements of the Public Sector Exemption listed below:

To satisfy the continuing education requirements under the Public Sector Exemption, on December 31, 2003 (engineers) or on January 1, 2022 (geologists) you must have been directly employed on a full-time basis by the State of New York or its agencies, public authorities, public benefit corporations or local government units in a position requiring licensure in engineering or geology and which was represented by a collective bargaining unit or, pursuant to Article 14 of the Civil Service Law, designated managerial or confidential. Since January 1, 2004 (engineers) and January 1, 2022 (geologists), if you have practiced engineering or geology (i.e. provided engineering or geology services) in New York State outside government service described above, the exemption no longer applies.
